

DAIRY HYGIENE TRAINING

X-Town Dairy Hygiene Training Lecture Manual has been used in several projects normally in connection with Dairy Training Course

■ **Introduction:**

- Through our various jobs especially abroad, it became obvious, that there often was a need for general basic training and understanding of the fundamental principle within general hygiene.
- The main idea behind X-Town Dairy Hygiene Training program was to prepare training and education program, which could be used for all employees involved in production and processing in the Dairy Industry, and which could be used as in-house training program.

■ **Dairy Hygiene Training Program:**

- Through the practical experience it became clear, that the training program needs to have a flexible training material, and it was found that the best way to obtain this, was to work out a training program as a Power Point Presentation.
- The Dairy Hygiene Training Power Point presentations are worked out as a basic overall introduction to all the subjects, which is important for all employees working within the dairy production, manufacture and processing.
- Through normal Power Point Presentation technique, it is also practical possible to prepare various training programmes according to the level and education of the employees to be trained.
- Dairy Hygiene Training consists of more than 125 illustrative Power point presentations
- Dairy Hygiene Training contains a section "Code of Practice Dairy & Food Factory"

■ **In House Hygiene Training:**

- *Use X-Town Dairy Hygiene Training to update your employees knowledge and understanding of the need of a good Hygiene behaviour*

■ **HACCP Training:**

- *X-Town Dairy Hygiene Training includes HACCP training module*
