

DAIRY TRAINING MANUAL

X-Town Dairy Training Lecture Manual has been used in several projects to an "In House Training Program",

■ **Introduction:**

■ One of the reason to Denmark is known for it's high quality dairy product, is without the doubt the Danish Dairy Education system, which probably is the most advanced dairy education system in the whole world.

■ It was also obvious from our various job abroad very many employee had no ordinary training and education in Dairy technology subject. According to our experience it would be of great help, if a basic introduction into Dairy technology were performed in connection i.e. with the introduction and implementation of the Quality & Working manual.

■ **Dairy Technology Lecture Manual:**

■ X-Town Dairy Technology Training Manual is inspired from many years of experience with dairy technology, education and training and is worked out as an easily understandable lecture book, which can be used both as a normal lecture book and as class room training material.

■ The manual contain give a brief introduction to all subjects important for operating a milk plant, just as it has a section containing the flow diagram of X-Town Dairy and a many Power Point Presentation, which can be used for training of the employee in a class room.

■ Dairy Technology Manual contain many flow diagram and illustration to support the easily understandable text, just as it is supported by Power point presentation, which can be very helpful by in house training.

■ **Factory Training:**

Use X-Town Dairy Technology Training Manual to update your employees knowledge and understanding dairy technology and improve your product quality.
