

QUALITY & WORKING MANUAL

X-Town Dairy Quality & Working Manual:

More than 30 dairies in Denmark & abroad has worked out their own factory specific Q & W manual, alone or in co-operation with JP Consult - Several of these dairies has been certified by

■ **Introduction:**

■ In December 1999 JP Consult and 14 Danish dairies with all type of production Liquid milk - Butter - Cheese and with a yearly milk intake in the range from 4 to 70 mill. kg/year. decided to start a common project to develop a standardised Quality & Working Manual

■ **Project Idea:**

■ All daily recording and quality control in the milk plant should be based on and described in one manual.
■ The Quality & Working Manual should contain sections for all relevant subjects and fulfil all EU law & regulation
■ The Dairy's own performance affordable for even small and medium-sized dairies.

■ Well defined product standard for produced product

■ All production processes should be described by Process Info - Flow Diagram - Control Point

■ Risk evaluation in all production processes should be based on HACCP principles

■ Plenty of flow sheet and template for all kind of dairy production

■ **Q & W Project:**

■ X-Town Q&W Manual is based on Microsoft Windows, Word & Excel. Anyone who have a general EDP knowledge would be able to work out a factory specific manual based on text, flow sheet and template in X-Town Dairy Quality & Working manual
■ A factory specific Quality & Working Manual worked out chapter by chapter, will save you a many hours work, but still maintain a high Quality & Working manual

■ **Q & W project:**

Several projects have shown, it is possible to introduce a complete and fully workable Q&W Manual within 4 to 6 week by using the JP Consult standardised Q&W Manual as basis.
